

# Meet Praetorian Guard

Find the breach point before the compromise finds you.

The continuous offensive security platform built for continuous threat exposure management.

**Security isn't static. Your attack surface isn't fixed. Risk doesn't strike twice, it breaches once.** Most organizations still rely on point-in-time tests, noisy scanners, and bloated tool stacks that flood teams with data but deliver little clarity. Praetorian Guard changes that.

Built for Continuous Threat Exposure Management (CTEM), Praetorian Guard unifies offensive testing, vulnerability management, and adversary emulation into a single managed platform; combining automation with Praetorian's elite offensive security engineers.

The result is a continuously validated view of what's actually exploitable, empowering security leaders to focus resources on the risks that matter most. exploitable risk instead of chasing superficial alerts.

**Clarity over chaos. Proof over perception. Continuous confidence.**

## A Proactive, Prevention First Strategy

Praetorian Guard shifts organizations from reactive detection to proactive prevention by continuously identifying exploitable weaknesses and validating real attack paths before adversaries can use them.

## A Continuous Threat Exposure Management Platform Built and Managed by Offensive Security Experts

A managed CTEM solution powered by Praetorian's offensive engineers combining automation, red-teaming expertise, and continuous validation to help enterprise security teams prove and reduce material risk.

## Key Capabilities

Continuously Identify, Validate, and Eliminate Real Risk , Not Just Vulnerabilities.

### Attack Surface Discovery & Mapping

Continuously monitor your digital footprint to uncover blind spots before attackers do.

### Unified Vulnerability Management

Filter noise and prioritize vulnerabilities validated by real exploitability.

### Continuous Penetration Testing (Adversary Emulation)

Continuously validate your defenses through real-world attack paths executed by Praetorian's offensive engineers.

### Adversary Intelligence

Integrate emerging TTPs and attacker insights before they're seen in the wild.

## Benefits of Praetorian Guard

### Consolidate and Simplify

Replace siloed tools with one managed platform and measurable results.

### Always-on Security Experts

Extend your team with Praetorian's elite engineers for continuous guidance.

### Compliance Built-In

Annual test coverage included, but validated continuously.

### Focus on What's Real

Eliminate false positives and prioritize by exploitable impact.

### Prove Risk. Earn Buy-In.

Demonstrate impact with clear, evidence-based reporting that drives action.

### Validate Remediation

Confirm that fixes work and your exposure stays closed.

## Why Praetorian?

Built by offensive security engineers, not software vendors. Unified automation and human expertise deliver precision , not noise.
