

Praetorian Overview

Find the Breach Point Before the Compromise Finds You

Praetorian helps the world's leading enterprises see through the eyes of an attacker and act before compromise.

We deliver human-validated clarity at an AI-driven scale, enabling defenders to focus on what matters most and strengthen resilience with confidence.

Professional Services

Security Starts Where the Attack Begins

Praetorian delivers world-class offensive security expertise across cloud, application, corporate, IoT, and advanced product ecosystems.

Each engagement is designed to identify, validate, and prioritize material risk, reinforcing our core belief that Offense Informs Defense.

Product Security

Praetorian's product security testing identifies vulnerabilities across applications, APIs, and digital ecosystems.

Capabilities Include:

- ☒ Web Application Penetration Test
- ☒ Mobile Penetration Test
- ☒ API Security Assessment

Corporate Security Services

Praetorian emulates advanced adversaries across enterprise networks and identity systems to reveal real-world exposure.

Capabilities Include:

- ☒ External Network Penetration Test
- ☒ Internal Network Penetration Test
- ☒ Network Segmentation Testing

Cloud Security Services

Praetorian's cloud testing combines configuration review and adversarial simulation to identify exploitable paths across multi-cloud environments.

Capabilities Include:

- ☒ Cloud Configuration Review
- ☒ Cloud Penetration Test
- ☒ Cloud Attack Path Mapping
- ☒ Targeted CI/CD Assessment
- ☒ CI/CD Attack Path Mapping

Advanced Product Security

Praetorian brings specialized expertise to complex systems, hardware, and emerging technologies.

Capabilities Include:

- ✓ Risk-Informed Security Assessment
- ✓ Hardware Penetration Test
- ✓ Cryptographic / Protocol Analysis
- ✓ Software Reverse Engineering
- ✓ AI / LLM Security Assessment
- ✓ Thick Client Penetration Test

Red Team Services

Praetorian's red and purple team operations simulate targeted, goal-oriented adversaries to measure true resilience and validate detection capability.

Capabilities Include:

- ✓ Advanced Red Team Operation
- ✓ Assumed Breach Exercise
- ✓ Purple Team Exercise
- ✓ Attack Path Mapping
- ✓ Social Engineering

Continuous Security Solutions

For organizations seeking an always-on solution, Praetorian delivers Continuous Security through its managed platform, Praetorian Guard.

Praetorian Guard provides unparalleled security coverage by combining attack surface management, vulnerability management, breach and attack simulation, continuous penetration testing, and exploit intelligence into a single, unified managed service platform.

Praetorian Guard turns Praetorian's elite offensive expertise into a continuous program that identifies and validates real-world exposures as your environment evolves, providing continuous assurance that defenses work when it matters most.

Why Praetorian

There's a reason the world's leading enterprises trust Praetorian to validate their security where it matters most.

Born from the adversarial mindset, we combine decades of offensive tradecraft with modern engineering to expose real attack paths, prove exploitability, and deliver the clarity security leaders need to act with confidence.

Human-validated accuracy:

- ✓ **Zero false positives:** Every finding verified by an expert.
- ✓ **Material-risk focus:** We prove impact, not theory.
- ✓ **Elite expertise:** Decades of offensive experience across the Fortune 500.
- ✓ **Offense Informs Defense:** Every engagement strengthens detection and response.
